Here you will find all jackpot slots which have broken the million-pound payout mark. When it comes to these types of slots, there are several facts and figures that are of interest. Of course, the highest jackpot payout ever made is a big highlight of the games. But you should bear in mind that the jackpot will not always reach so high. For this reason, it is also useful to know the average payout figure. Also, the average time between payouts is a good indicator of how long a current jackpot is likely to build before it is won. You can see a breakdown of this information in the following tables.

Gonzo's Quest – with Increasing Multipliers for Big Wins RTP: 96% Manufacturer: – This game was one of the first to use the innovative NetEnt Avalanche feature. This sees symbols fall into place, rather than spinning. Every time you get a winning combination, the symbols explode, and new ones fall down to replace them. This can create numerous wins from just one spin. What's more, with every consecutive win, the multiplier is increased, up to a maximum of x5. There is also a free spins bonus round, or free falls as they are called here, where the win multiplier can reach as high as x15.

The graphics and audio are all a little dated but it has one big trick up its sleeve: hit five wild sun symbols on payline 20 and you win the progressive

jackpot; currently sitting just shy of £2 million. As timeless as a day at the beach.

For the following examples, some calculations were needed to ensure that a fair comparison could be made between various slots. The following examples show the potential winnings for a £1 per spin bet, with all paylines activated. For the calculation, it is assumed that the spin reveals the highest paying symbol (excluded wild and scatters) on all positions on the reels during normal play, free spins and features.

Ancient Persia is the setting for this five reel, 4 row, game from Playtech Origins. Any three, four, or five matching symbols triggers one of 1,024 different ways to win. The atmosphere is Arabian, the music is from the Middle East, and the overall aesthetic is on point.

These slots also have pooled jackpots, meaning that the jackpot prize is not only built by play at numerous games, but also at many of the top online casinos in the UK that offer them. This results in the jackpots building to bigger amounts at a faster rate. It is not just NetEnt, Playtech and

Microgaming who provide jackpot slots. There are other, smaller providers who also offer slots with jackpots. Many of their jackpots are relatively small, yet there are some exceptions, where big prizes can be won. You can see 3 of the biggest jackpot slots from these other providers [here](#).

The key symbols are the famous lion of Persia and the sun. Land the lion and you activate a classic pick a prize round. The sun triggers free spins with added power-ups. There are also four progressive jackpots to aim for. These are triggered randomly. Good luck.

Of course, you need to bear in mind that these games with higher maximum wins payout less regularly, or you may only see small wins whilst playing. But still, since we are looking for the games where you can win enormous amounts, this is a drawback we are willing to accept for this comparison.

Really was hoping this app would be different from the rest. Starts out the same, big wins, bonus spins. Then reality sets in, and lose, lose and lose some more. The following data may be collected but it is not linked to your identity:

Immortal Romance – with 4 Level Bonus Game RTP: 96.8%Manufacturer: –Another popular slot with higher than average maximum possible payouts is Microgaming's Immortal Romance. This vampire-love story themed game has 243 ways to win. It is not possible to place a bet of £1 – or equivalent – per spin, as the minimum bet per spin is 30p, and this increases in increments of 30p up to a maximum of £60. To ensure a fair comparison, I have converted the maximum payouts as if a £1 per spin bet is possible. After the scatter and wild symbols, the symbol with the next highest payout value is Sarah. With a theoretical bet of £1 per spin, a full screen of the Sarah symbol will result in a payout of £4050. When you get 3 scatter symbols anywhere on the reels, the Chamber of Spins bonus round is activated. The bonus rounds allow for even bigger payouts. There are 4 different levels to the bonus game. The first time the bonus game is triggered, you get 10 free spins with a 5x multiplier. This means you could theoretically win a maximum of £202000 in this round. Subsequent levels of the bonus round are unlocked the more times the bonus game is triggered. Each has its own features, including more free spins and different multipliers. Therefore, this maximum payout could reach even higher in the later bonus levels. However, that figure cannot be accurately determined, as further free spins can be won during the highest bonus round.

Find three Gladiator helmets on the reels and the Gladiator Jackpot Bonus is unlocked and you are presented with a selection of nine helmets, each offering a hidden cash prize. Three Colosseum symbols on the reels brings up the Colosseum Bonus where free spins are on offer.

Great Blue – with Plenty of Free Spins and Big Multipliers to Boost your Winnings RTP: 94.25%Manufacturer: –This slot from the iGaming giant Playtech has huge potential payouts. The shark and turtle symbols provide the largest payout, at up to 750x the line bet. What's more, if a wild symbol is included in the line win, the payout is doubled. The game has 25 paylines, so a bet of 4p per line is needed to total £1 per spin, or the equivalent in your local currency. If the highest payout of 1500 is achieved on each of the paylines, that creates a maximum possible payout of £1500 per spin. Then when you consider the free spins and multipliers the outlook is even more rosy. The bonus round is launched when 3 oysters appear on the reels. Here you pick shells which will reveal a hidden number of additional free spins, or a win multiplier. The most lucrative combination is the x15 multiplier, which comes with a maximum of 8 free spins. So if the highest payout symbols cover the reels on each of the free spins, this means a maximum theoretical payout of £180000, for just a £1 spin. You will find this slot in virtually all Playtech casinos, like Duelz

There are 2 variants of this slot, one with a progressive jackpot and one without. As we have already seen the jackpot version above, here I refer to the non-jackpot version of the game. The game has 25 paylines, and you can place bets of between the equivalent of 25p and £1250 per spin. The highest paying symbol is the emperor Commodus, with a payout of x5000 for 5 symbols. Therefore, a £1 bet where the whole game screen is filled with the symbol will result in a maximum payout of £5000. The game also features the Coliseum bonus round, which is triggered by 3 scatter symbols. Here, you can win up to 12 free spins with up to a x3 multiplier. Therefore, the highest payout you can theoretically achieve in the bonus game is £180000. If you fancy trying your chances of pocketing the big potential payouts in this game, you can play it at William Hill Casino.

If you want to play for really big money, the progressive jackpot slots from Playtech, Microgaming and NetEnt are top choices. There are plenty of games where payouts can exceed a million. Yet it is not just jackpot slots that provide the opportunity to win big. Within the game collection of these major software developers, you can find some enormous maximum potential payouts.

One of the most popular slots is NetEnt's Starburst. It has 10 paylines, with wins paid both ways. There are 10 bet levels and an adjustable coin value of between 1p – £1, or equivalent. Therefore, a coin value of 10p at bet level 1 will allow for a £1 spin with all paylines covered. The highest paying symbol is the golden bar, with a x250 payout for 5 matching symbols on a payline. So if the entire screen is covered with this symbol, a maximum payout of £500 will be made, given that the payout will be made for right to left wins, as well as the usual left to right wins. This already looks pretty low compared to many other slots. Of course, free spins and bonus rounds must also be taken into consideration when determining the absolute maximum theoretical payout. In this game, a Starburst Wild symbol can appear on reels 2, 3 or 4. This symbol expands to cover the entire reel, and triggers a re-spin, with a maximum of 3 re-spins possible. Yet this will result in an absolute maximum payout of £2000 if all positions continue to display the bar symbol on all 3 subsequent re-spins. Compared to many other slots, this is a relatively small maximum payout.
