Progressive jackpots are a favorite among real money slots players because of the potential for big wins. In progressive slots games, multiple players contribute to the jackpot for a selected game. Whenever a player spins the reels, a percentage of their bet goes towards the jackpot pool.

The winnings are huge because the longer it takes for someone to win, the bigger the amount gets. Also, when someone does win the jackpot, the number does not reset to 0 - it restarts from a predetermined amount, usually 1 million. Every slot has a set of symbols, and normally when 3 or more land on a payline they form a winning combination. While some slots have fixed paylines, such as the 10 winning lines you can find in Netent's Starburst, some of the latest slots have done away with the traditional payline and introduced 243 and 1024 ways to win. This means that you win if you simply have identical symbols on adjacent reels, such as in Aristocrat's Buffalo.

If you want to understand how a real money slot pays out, you must study the payable. Here you'll find what the highest and lowest paying symbols are, how many of these you need on a line to trigger a specific win, which symbol is wild and what other symbols it substitutes for, if

there's a free spins bonus round triggered by the scatter symbol and how many extra games you can win, and so on.

The RTP tells you how much the slot gives back to its players for every bet made over time. This means that the higher the percentage, the higher the chance of receiving cash back as you play. Look for slots with an average online slots payout of 96% and over to reduce the house edge—this is what you're left with if you subtract the slot's RTP from a 100%. This means that in a slot with 96% RTP, the casino will have an advantage of 4%.

Now that you understand more about slot mechanics, paytables, and RTP, it's time to compare different online slots before playing with your own funds. Practicing with free slots is a great way to find the themes and features you like and know the game before playing online slots for real money. Choose from a library of over 10,000 free slots here at VegasSlotsOnline.

Decide how much money you're willing to bet and set yourself daily, weekly, or monthly limits. Any trustworthy casino will have this functionality available as part of their Responsible Gaming tools. If you go over that amount, it's time to take a break. Only play with funds that you're sure you can spend. If you're on a tight budget, we recommend joining a good minimum deposit casino.

While slots which have big wins sound great, the frequency at which they pay out is quite low. If you want to improve your odds on a small bankroll, opt for online slots which pay out smaller wins more frequently. It's also a better way of managing your funds, since to be in the chance of winning the biggest of jackpots you must play for much longer. If you'd like to learn more about picking the best slots tailored to your bankroll, read our guide below.

☐ Sticky wild symbols stay on the reels for the next spin, and can also remain there for a number of future spins, depending on the slot. You can try this feature in NetEnt's Dead or Alive slot, where the wilds stick to the reels for the remainder of the Free Spins round.

Scatters are those symbols that trigger extra spins and mini games when you land 3 or more of them, usually. However, have a look at the payable of your chosen real money slot online to confirm exactly how many scatters are needed to activate the bonus round.

Respins occur at the end of a base spin, where you can spin one reel again while the rest are locked into place. Multipliers increase your payout by a set amount, such as a 2x multiplier where your win is doubled. You can find multipliers in the base game, in free spin rounds, and even during respins.

□ In Microgaming's Book of Oz slot, you'll find a Respin feature present on all 5 reels. One of the most convenient things about online real money slots is that there are games for all budgets. It doesn't matter if you have \$20 or \$20,000 in your bankroll. Chances are that you'll find a game you like.

We'll go into more detail about the differences between low and high stakes slots below. Have a look at our table to decide which slot limits are best suited to your needs:

Slots real real money online

Low limit players can play for as little as \$0.01 on penny slots such as Book of Dead, by betting 1 coin with a value of 0.01, and adjusting the number of paylines to 1. You can stretch a \$10 or \$20 bankroll for a while on that. However, keep in mind that penny slots can cost more than a cent, since there is a fixed number of paylines on some slots. For example, if you play on slots such as Vikings Go To Hell, the number of paylines is fixed at 25, and you can only adjust the coin value. This means that a \$0.01 bet will now cost \$0.25 per spin (which is still a good bet for low stakes players).

Usually, high stakes slots are the ones which have a minimum bet of \$5 per spin. While this might not sound like a big amount at first, if you play a couple hundred of spins the numbers will start adding up. High limit slots also allow for maximum bets of \$1000 and over, which is why they cater to high rollers. What's more, these types of slots usually have a bigger Return to Player percentage (RTP). This means you'll have the chance to win bigger by placing larger bets. Keep in mind that there's a risk of losing more money here, and that these slots are best played by professionals.

Now that you can spot fair slot games, it's time to look for reliable banking options for your real money play. Have a look at our recommended payment methods below.
