Brand power and identification are defining traits of any thriving business, and the same can be said about the games that one finds in a casino. From the name of the company that makes the game down to the name of the game itself, these are important signifiers to players because they carry things like status, payout likelihood, player experience quality, and more. Casino games don't just serve as vessels for potential wins, they do a lot more. In many ways these games of chance have the same fulfillment value that reading a book or taking in a movie at the cinema would have. There's also a strong social element and camaraderie to gaming, and it's something many players seek out.
