Rome Casino was caught cheating players in 2009 by not including a wild symbol necessary to win a jackpot on some of their games. To their credit they did step up and made restitution to affected players eventually after being publicly caught out, and blamed a "software bug" for the error.

Of all the terrible terms at this casino, this would have to be the worst. Buried half way down the wall of text where they hope that no-one will read it, the Rome Casino people have slipped this little nugget of doom in for anybody who deposits less than \$250 at a time. Yes, you read that correctly - if you deposited say \$100, the most you could ever win at this casino from that deposit is \$1000, even if you play without a bonus or win a progressive. Scandalous!

There are different deposit methods or payment options and methods available at Rome Casino, which is another reason for their popularity. Usage of credit cards like MasterCard, Visa, Discover Cards, Diners Club is the most common payment method. The next method of payment is the use of E-Wallets. Neteller, Click2Pay, Moneybookers, UseMyWallet, eWalletXpress and EcoCard, are the most commonly used and eligible e-wallets. All these methods along with wire transfers are acceptable at Rome Casino.

Rome VIP Casino (renamed from Rome Casino) has gained in popularity with its wide array of features that include different deposit methods, large bonuses and a long list of games backed with a professionally handled site and customer service. The first feature that you see when landing on the homepage of Rome Casino is their huge deposit bonus offer. Players will also see that they can download and install free software that would assist them in connecting with the Rome Casino interface. The group that owns this casino is Dice Partners LLC.

Stay away from this casino! They are working together with Mona casino (the same payment department, the same customer service, the same server). They trick players and most important THEY DON'T PAY WON MONEY!!! Dodgy bonus system, horrible withdraw system, unprofessional and rude customer service. One again - STAY AWAY from both Rome casino and Mona casino!!!

The software at Casino Rome USA is powered by Top Game. They're a well-known software company who have been around since 2008, and a lot of the games that they have created are centered around 3D graphics. This leads you to have better games than you would find at most online casinos, and although there might not be as many of them as you can find at some other places, you also don't have to contend with any of them being blatant copies of others. This software features a lot of slots, video poker, table games and traditional casino games. Everything is wrapped together with high-quality SSL encryption that keeps your gaming experience secure and safe. Security is one of the most important things focused on at this casino, just as you would expect from a site based on ancient Rome. The software of Rome casino, together with Royal Panda casino, was ranked as one of the best of all online gaming platforms in Canada from MapleOnlineCasino.net. Check out the link to read the review in detail and get free casino bonuses.

On the home page, players will notice the banners that are turning in the top section of the screen. One of them advertises the welcome bonus that new members to the Rome VIP Casino will be able to receive when they join. It is a remarkable 500% bonus on players' first five deposits on site. So, rather than a sole first deposit deal, the casino has spread the welcome over a multiple of deposit transactions to reward those who join and then stay loyal.

The site is partnered with third party content providers (how the website refers to the game developers), Octopus Gaming, Betsoft and VIG. All of these are notoriously some of the most respected companies in the industry and help to provide a popular selection of titles on Rome VIP. However, these aren't the most prolific and profitable developers in the industry and, therefore, some of the most popular titles in the industry do not feature in the portfolio. This is a real shame for those looking to play the very best online casino games.

The licences and regulations of the online casino is none the government of Curacao. Notoriously one of the least reliable online casino regulators in the industry, the central government have invested heavily into ensuring the site is a safe location to enjoy online casino with and all payments and winnings are safe and fair. However, it is important to recognise that concerns about the site's legitimacy have been raised elsewhere on player review websites and this should be recognised by those who are contemplating registering with Rome VIP Casino.

Rome Casino is a Costa Rica based Top Game casino with a chequered history. We recommend that players steer clear of this casino due to a litany of unfriendly terms and conditions designed to both trap and prevent inexperienced players from winning.

If the site was registered with Gibraltar or Malta, these qualms might be easier to ignore. Sadly, with Curacao not being as reliable as it wants to be at this moment in time, players should take extra care spending their time and money on Rome VIP Casino.

The deposit and withdrawal details are strictly available for those who are signed up to the site and logged in to their accounts. Considering the terrible anti-player terms, the history of cheating players through an "accidental bug", and the fact that they are "licensed" in Costa Rica where they are accountable to no-one, it comes as no surprise that we recommend players stay far away from Rome Casino and any others operated by TVMUK or Morriyen N.V.

Rome VIP Casino may not have been built a day, it has taken time to nurture and grow this online casino into what it is today. There's no doubt that they have good foundations to be successful site, including good range of games, promotions and a 24/7 support network. However, the secretive nature about their banking suggests all is not well on this site.
