The ROBLOX site and forum have received a lot of criticism from its users regarding many issues, such as: Administrators are able to delete user-created games without warning or notice. Users can't defend themselves since the only way they could do so is by contacting an administrator or lawyer. Administrators can ban users for doing anything they don't like or don't agree with. However, administrators have been known to ban users for no reason at all, usually if the user is a moderator or an insignificant/low-level user.

Hacking Roblox is a problem that will always exist. This is because there are many different forms of hacking that are constantly evolving. One of the most common methods of hacking Roblox accounts today is through phishing. This method involves an email being tailored to look like it came from a trusted sender to gain access to a person's account and information such as passwords, usernames, mother's maiden name, Robux balance, etc. Another way that hackers hack into Roblox accounts is through using proxy sites. This method involves people using websites that offer their own proxies in order to hide their inputs and output information from the public eyes. People can hack a password by using the obtained information from other websites and then use an automated script to guess the password. This method is not only used for Roblox, but also for other accounts that are associated with games.

No microtransactions. Roblox does not have any in-game purchases or microtransactions, meaning that you can play as much as you want without worrying about being charged each time. This works very well as the developers have a different way to monetize their system - which we'll discuss further on into this review.

This should be more than enough for anyone out there to use if they need some methods for getting free robux on roblox and without having to spend any money. I would definitely recommend using this, as this will be more than enough for you to start enjoying getting free robux on roblox right away!
