On December 15th, 2018, ROBLOX announced the end of the open beta for their new trading system. The company removed the ability to trade in-game currency among users and limited users' ability to purchase system currency from outside sources while adding even more security features by requiring cards or other forms of identification before buying virtual currency. The reason for the change was to prevent users from spending too much virtual currency on outside purchases of no value to the user. The system was a success, reducing the rate of fraud.[25]
