One of ROBLOX's main rivals is Tencent, a Chinese company. The two companies even share employees and developers, including the current admin. ROBLOX as well as Tencent are often compared to each other due to their similarities.

In January 2015, the official Roblox Studio 2 was released on Steam. It allowed for cross-platform development with Windows 10. However, any existing games made with the previous version (R-Engine) will not work with this new version since it uses a completely different engine.

Rated 5 out of 5 by Anonymous from ROBLOX is the Best Roblox is the most fun thing I have ever done in my life. I play this game because there are still lots of games to play and exciting things to do on roblox and this game includes places all over the world, like, for example: I went to see where Roblox came from and it was really cool! This is one of my favorite games that have ever existed.

They say content is king, and this statement could not be more accurate for Roblox. Why? Because on Roblox, players are able to make their own games within the game itself! These games are called "games" or "sims," and they can be accessed from a GUI called "The Catalog." There are tons of free games that players have created and uploaded for others to play. In order to play these games, you have to purchase them using free robux. You can also make your own game and make it either free for others to play or charge for everyone else to play.

A game called "The Mad Murderer" has been criticized by Roblox users as being violent. The game allows players to kill other characters by using a knife or a gun. It was reported that German and French users discovered the game while they were in Las Vegas for a conference. In response, Roblox changed the coding of this game so that the users can only use the knife when playing the game, instead of using guns as well. Players who used guns on other players would be banned from Roblox. Roblox stated that they were "going to continue to refine the game".
