What is a Minecraft Server List? – A Minecraft Server list is a list of servers that you can use to connect to. In order to use one, all you need to do is type in the IP address or host name and then choose one from the list that appears. If you are using a Bukkit or Tekkit server, then there will be some connection issues that need to be sorted out before connecting directly through the IP address or host name. For more information about this, please refer to our article on how to connect to your minecraft server here."

On June 22nd 2021, Facepunch announced that Rust would be shut down on July 14th 2021 due to risk of further financial hardship, citing that it was "no longer sustainable". With this announcement came the release of a demo version of the game with all current features intact. The game was transitioned from being under development to being a completely stand-alone product, allowing for players to download and play whatever version of the game they preferred."

Minecraft Servers are generally run on either a physical server or a virtual private server (VPS). A physical server hosted by the user and rented from third-party companies, ISPs, universities etc. or free services like NFOservers.com, Adverline.pl and VirtualRack.co.uk which are VPS's seems to be the most common way to host your Minecraft Server. A VPS or physical server is better for most, since it is more stable and customizable and can be set up to run on the same machine as the player's computer allowing for an instant jump in to a server when desired."
