As of September 13th, 2018, ROBLOX has officially released the feature for all users.[86] On October 1st 2018, ROBLOX added an update which allowed players to make comments and rate their favorite games and places. The company claims that this feature was added to make it easier for players to find games that they actually enjoy playing.

In January 2013, the Chinese government started an investigation into various MMORPGs to determine whether the genre was suitable for children.[58] The same year, Sigaty discussed the possibility of a Battle.net-like service for World of Warcraft.[59]

Roblox cannot afford to go down the path of Farmville. They need to remain an open source program for everyone, where people can come together as equals and play fun games without being forced to pay money to be able to continue having fun within their virtual world. People who think they can't afford to pay should just get used to not having an ROBLOX account because that's what's happening. People are being kicked off the server by player banning.

If you are a new player to Roblox then I would definitely recommend this game. This is because the game offers a lot of different features, and it even allows you to earn points from playing and completing different quests.
