On January 1st 2019, ROBLOX released a new core version update for their engine. They are now using a new source engine called "Bloxlet" and integrated a new built-in physics engine into the game. This feature will allow users to play in one of three different modes: Classic ROBLOX mode which uses the older physics system from ROBLOX, Bloxlet mode which uses the new physics system in ROBLOX 2.0 and fixed bugs, and Customized mode which allows players to customize their own physics setting. This update was expected to start being released in-game on January 15th 2019.[101] This release ended up having some bugs which caused users to get stuck in the game and crashes.[102] However an update was released a few days later, which fixed most of the bugs and added more control for players to customize their suitable physics settings.

In July 2012, ROBLOX released a list of their top 100 games with the most concurrent players at any one time. The list features a variety of games such as "Rage Place", "Create the Universe 2", and "Survival Games: Mine". The game with the highest number of concurrent players at the time was "Mineblox", which had over 10,000 players on it at once.

If you are a new player to Roblox then I would definitely recommend this game. This is because the game offers a lot of different features, and it even allows you to earn points from playing and completing different quests.

Rated 5 out of 5 by Anonymous from Creating games is awesome! I like playing ROBLOX because I can create my own game and put it on the store. It's really fun! Rated 4 out of 5 by Anonymous from Awesome game I like playing ROBUX for ROBLOX because: It helps me learn some things in my life. You can build anything you want in ROBLOX (houses, cars, etc.) You can play with friends and have fun You can play with your friends in the same room It has a lot of places on ROBLOX that you can go. For example: McDonald's

As I have mentioned before, there are a lot of other generators available on the market. However, I only recommend that you use this and the Rosetta Brothers Robux Generator because they work perfectly and they don't show any problems after some time has passed by.
