Roblox has been criticized for the number of advertisements in their games. In 2016, the company stated that one of their games had over 5 million advertisements. They also stated that over 18% of the players would click on the advertisements.

Spamming: Roblox has been criticized for its extreme amount of spam. Some examples include the "Free Robux" scam, where people are tricked into giving their username and password to a third party so that they can steal their Robux, and the "You Have Been Tricked" scam, which consists of the offender saying something along the lines of "DON'T TRUST. HE IS TROLLING ME."

On February 29th 2018 there was a large DDOS attack on roblox which left most of the games not loading and many users getting kicked from games due to it. On March 1st 2018 the company announced that a hacker had gained access into their database and multiple users personal information was leaked mainly password, username and email addresses.

Implementing technology such as Oculus Rift and PlayStation VR would allow the company to create new VR games. Again, ROBLOX has been criticized due to its unusual (less than the minimum) end user license agreement. Roblox has released a new version of its app called Ava (ROBLOX's Mobile Application). See above section for more details.
