How to Connect to a Minecraft Server – The way in which you connect to a Minecraft server depends on what kind of server you are using. If you are using a Bukkit or Tekkit server, then the connection will be handled automatically and everything connected through the same IP address. You can connect directly by typing the IP address into your internet browser or the host name of the server. If you are using an individual private server, you will need to know an IP address of where your Minecraft Server is located. The easiest way that anyone can get this information is by going to their router's configuration settings and finding out the IP address given from them. This IP address is different for each device and will be different every time that a person uses it.",

How To Download Mods – The Basics. Before downloading any kind of mod, be sure that you know exactly what kind of mod it is. Mods differ from one another in many ways and although they appear similar there are some fundamental differences as well, even if they look not yet obvious at first glance. For example, there are many different kinds of mods and these are generally divided into those that add new blocks/features to the game and others that change the game's existing rules.",

January 11th 2021 saw the release of Alpha 18, which introduced in-depth changes to the structure of the game's map generation system and an increase in complexity for combat and survival. This release also saw Facepunch studios change their focus from free-to-play to a closed beta group on Steam, as well as a slight reduction in difficulty.",
