On January 1st 2019, ROBLOX released a new core version update for their engine. They are now using a new source engine called "Bloxlet" and integrated a new built-in physics engine into the game. This feature will allow users to play in one of three different modes: Classic ROBLOX mode which uses the older physics system from ROBLOX, Bloxlet mode which uses the new physics system in ROBLOX 2.0 and fixed bugs, and Customized mode which allows players to customize their own physics setting. This update was expected to start being released in-game on January 15th 2019.[101] This release ended up having some bugs which caused users to get stuck in the game and crashes.[102] However an update was released a few days later, which fixed most of the bugs and added more control for players to customize their suitable physics settings.

As of September 13th, 2018, ROBLOX has officially released the feature for all users.[86] On October 1st 2018, ROBLOX added an update which allowed players to make comments and rate their favorite games and places. The company claims that this feature was added to make it easier for players to find games that they actually enjoy playing.

They're clearly taking steps in this direction by creating special perks, abilities, etcetera for those who have purchased robux from them. They're also creating clothing items which are being sold for outrageous prices with the sole purpose of being able to differentiate those who pay from those who don't in their game. This is wrong. It's unethical and it should not be tolerated.

The first game to have a massive economy was Weebly Pages where they implemented a currency which included things such as energy, the ability to teleport to different locations, and more. There were about 4 things that were the most expensive at the time: The North Pole Room and Casino, Room of the Dead and Old Africa, and The Technology Lab and City. [119] Weebly Pages later went on to become Pikazo. [120]
