The first product launched by ROBLOX was "Builders Club" on May 21, 2006 which allowed players to create 3D environments and watch other players' creations online. This product was followed by "Dance Off" on November 29, 2006. Both of these games had been in development since the launch of the website; "Dance Off" being originally named "Crazy Dance Fight". In 2007, ROBLOX launched a new line of products called "Roblox Toys". The first and only one to be released at that time was "Helicopter", which was shipped in December 2007.

Looking back at my own experience with Minecraft, it's so easy to see why people were so obsessed with it. The game was all about survival. It was about building a new life out of nothing. Things that would make you successful weren't free; they required you to work hard for them. But they were worth the wait, because it would mean you'd gather more items over time, and then you could make your house bigger or better fortified. The game was about connecting with your friends, and making sure that they were safe and able to live their own lives in the Minecraft world as well.

On May 31st, 2017, ROBLOX announced that they would be adding the ability to purchase ROBLOX Points via PayPal, which will allow for them to offer virtual currency for in-game items and ROBUX purchases.[17] The announcement was made on the official blog.

On July 15, 2018, Roblox apologized after a server error caused a character called Calvin to be subjected to harassment which included cruel messages. The harassment included being charged with child pornography even when the player was found innocent by law enforcement officials. In addition, this caused some users to temporarily change their username.

I know I made this review long but please read every word because I put a lot of effort into making this review good and hopefully it can help someone. Thank you for reading and keep in mind that this is not my full opinion on Roblox it is just a suggestion to help improve the game for everyone who plays.
